The Arthritis Foundation Exercise Program is an exercise program designed specifically for people with arthritis that uses gentle activities to:

- help increase joint flexibility and range of motion
- help maintain muscle strength

All exercises can be done while sitting or standing.

Instructors who have undergone a special Arthritis Foundation instructor-training workshop conduct the classes. The exercises you learn in the program, however, should not replace therapeutic exercises prescribed for you by a therapist.

Participants previously enrolled in the program have experienced such benefits as increased functional ability, increased self-care behaviors, decreased pain and decreased depression.
