DR. GABRIEL HERSCU

Bio

Dr. Herscu grew up in Oakland, California where his extended family still resides. He completed a degree in electrical engineering at University of California, Davis before attending medical school at the University of California, Irvine School of Medicine. He obtained his general surgery training at the UC Irvine Medical Center and then a 2-year Vascular and Endovascular Surgery fellowship at the University of Southern California Medical Center in Los Angeles.

He is a Vascular and Endovascular Surgeon, specializing in minimally-invasive treatment of arterial and venous disease. Additionally, he serves as the Medical Director of the Vascular Laboratory at Washington Hospital Healthcare System.

His vascular background proves to be a critical component of care for many of the patients treated at the Washington Center for Wound Healing and Hyperbaric Medicine since a vast number of them have vascular complications contributing to impaired wound healing. With a comprehensive approach, Dr. Herscu identifies the underlying cause of non-healing and corrects the source of the problem.

Dr. Herscu is married to Hilary Jessica Herscu and has three young children. In his free time, he enjoys running, hiking and music.
